

# Required Apps

---

## What Apps do I need?

---

- You should have the Apps listed below loaded and ready to go for day 1. Other core apps will be "pushed out" to students' iPads on the first day of school via the Airwatch App. These core apps will also be used across all subject areas. They will be distributed to students on their first day of school. These apps are essential school apps. Any extra apps, music or photos should be limited to no more than 2-3 Gb to allow enough storage on your iPad for schoolwork.
- 

## Apps to have installed on your iPad ready for Day 1 of school.

\* iWorks

The Apple iWorks suite of Pages, Numbers, Keynote, iMovie and Garage Band should be included in the purchase price of your iPad\* Click on the images above to find out more about each app.

### Airwatch Agent

Enrolment in Airwatch allows the College to distribute the necessary Apps that we require all students to have. It also allows us to identify devices on our network to better manage our internet bandwidth.

Click on the image when using your iPad to go directly to the App store to download the correct App

DO NOT try to enroll in Airwatch. This will happen on your first day at school.
